I want to share this new discovery: I found a cheat for an old program, that I haven't used for a long time (since I don't have it in hand for now). It's actually the old ISDN driver for Soundblaster Pro 2.92 (or something like

that). The author of this driver is the famous Soundblaster program creator: "Sgix" (a very old friend of mine). First of all, if you don't know anything about this driver, then it's totally safe for you (it's from old age). Also, if you are familiar with the program, it can be very useful for you

and you might want to try it.
